## AUTOMATED UTILITY BILLING SYSTEM

In August, the Plainfield Utility Billing Office implemented the "E-Lockbox" feature. This feature sends funds from our customer's bank accounts to the utility billing department quicker than before. When a customer pays their utility bill using their banks bill-pay option, we now get the funds electronically-in 3 business days-instead of their bank mailing us a paper check-which can take from 5-10 business days.

Signing up for this feature will speed up the processing of the payments and eliminate the risk of payments being lost in the mail. It is important to use only the **account number** listed on the billing statement; if customers use any other numbers or words in the automated system like **"my water bill,"** this can cause the payment to be delayed.

If customers have already set-up recurring utility bill payments, it is important to double-check the listed delivery method through the customer's bank. Check out the example below. The delivery method should read "Electronic Payment" rather than a paper check. This will also guarantee the payments will be posted to their accounts much quicker than before.
